

November 14, 2011

Senator Durbin
525 South 8th St.
Springfield, IL 62703

Dear Senator Durbin;

Thank you for accepting this letter on behalf of the Lincoln Logan County Development Partnership; we are writing to ask that you vote to continue wind energy tax credits. These tax credits have made many economic opportunities available in our area and continue to open possibilities for the future.

The Logan County Board estimates that they may gain approximately one million dollars in revenue from the construction and permitting of wind farms in Logan County. 71% of this revenue is destined for area schools in an effort to increase the quality of life and the standard of the educational facilities in our communities. If the tax credits that wind farms can now take advantage of were to disappear the potential for an additional two wind farms in Logan County would become unfeasible.

As we look toward the future Central Illinois communities need new and innovative businesses to take an interest in them. These tax credits not only help the United States in developing its renewable energy sources but also help small communities entice new employers and stimulate their economy. We would be happy to speak with and show you the potential benefits wind energy may have for Logan County. Please vote in favor of keeping wind energy tax credits. We thank you for your service and attention.

Best regards,
