# Decision Support Briefing

Bottom Line Up Front

What	Where	When	Impacts
Turning colder with a chance of snow	Entire area	Friday night	<ul style="list-style-type: none"><li>• Snowfall does not look significant at this time.</li></ul>
Snow showers	Much of area	Christmas Eve (Sunday)	<ul style="list-style-type: none"><li>• Too soon to say if snow threat will be significant.</li></ul>

# Decision Support Briefing

## Forecast Highlights

- **Generally quiet weather is expected across central and southeast Illinois over the next several days.**
- **The next chance for widespread precipitation is not expected before late in the week.**
- **Temperatures will average above normal until the end of the week. Colder air is expected to spread across the area starting Friday night.**
- **A weather disturbance may bring snow to the area Christmas Eve (Sunday). It is too soon to say if snow threat will be significant.**
