Walter Associates, Inc. (1975-2008)

Owner and Operator

Provided Building Restoration Contracting, Inspection, and Specification Services in the United States and Internationally for industrial, commercial, military and institutional facilities. Specializing in Natural Stone and Terra Cotta Restoration and masonry preservation techniques.

Eagle Scaffold Consultants, Inc. (2004-present)

Owner and Operator

Provide inspection and repair services for permanently installed suspension hoists on high rise buildings. Provide technical services in analyzing suspension scaffold hoist systems utilized for personnel and equipment on high rise buildings. Evaluate structural components of building facades and usage requirements for permanently installed scaffold systems installation on existing and planned buildings. Develop scaffold safety training and implementation codes for high rise building suspension and hoist equipment.

**Masonry Restoration Technologies & Services,
LLC (1989-present)**

Masonry Restoration Engineer

MRTS is an architectural masonry, stone and concrete restoration consulting and testing services company. MRTS provides architectural services for the evaluation and analysis of building facades for the purpose of determining structural integrity of building fabric. The services MRTS provides are complete building analysis of existing conditions; project management; testing of building materials and systems; structural engineering; test sample installations of repair materials and procedures ; mold analysis; photogrammetric and video; forensic architecture; laboratory materials testing; preparation of technical specifications and C.A.D. repair drawings; construction safety consultations, including scaffold safety; establishment of preventive maintenance programs; acoustic engineering; and restoration project management.

The Cornerstone Restoration Group, LLC (2006-present)

Instructor

Provides educational services for the Restoration and Preservation Industry. Designed to instruct Architects, Engineers and Contractors the procedures and materials utilized to render the best possible project. Education involves hands on training and classroom sessions built to either specialize in certain preservation techniques or employ a general restoration program.
